MINEBUILD GLOBAL

CAPABILITY STATEMENT

Your trusted partner for mining project, strategy, definition and delivery

STRATEGY
support for unlocking value potential through informed decision making

DEFINITION
through a collaborative, balanced, risk-aware approach to deliver fit-for-purpose outcomes.

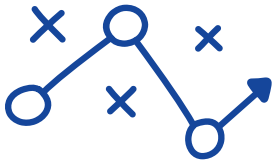
DELIVERY
by partnering with clients for successful, timely & budget-conscious project delivery.

OUR COMPANY

MineBuild Global is a newly established project management and technical services provider committed to supporting clients advance their mining projects with a results-driven, hands-on approach. We operate with an owner-minded perspective, treating each project as if it were our own to ensure exceptional outcomes for our clients. Our expertise spans the entire lifecycle of mining projects, from greenfield start-ups to brownfield redevelopments and operational expansions. With a passion for progress, we are dedicated to transforming challenges into opportunities, helping our clients achieve their strategic goals while navigating the complexities of the mining industry. We are here to help you bring it all together.

OUR EXPERTISE

SUPPORT IN STRATEGY



We work with and support clients in navigating through the ambiguity that is often associated with early stage mining project

SUPPORT IN DEFINITION

We recognise that the value of a mining project lies within its unique mineral deposit. Strategic investment in mine development and infrastructure is essential to unlocking this potential. We collaborate with our clients to maximise value throughout the project definition stages by employing a balanced, risk-aware approach, drawing on our collective experience to deliver fit-for-purpose outcomes.

SUPPORT IN DELIVERY

We are committed to partnering with our clients to ensure successful project delivery. Our team shares their passion and drive, supporting our clients throughout the entire journey. By collaborating closely during the project strategy and definition phases, we gain a deep understanding of our clients' requirements. This collaboration enables us to provide support in delivering projects within time and budget constraints, ready for revenue generation.

OUR FOUNDER

James Howard, a seasoned Mining Engineer with over 25 years of experience across technical, management, and executive roles, founded MineBuild Global to support senior management teams in project strategy, definition, and delivery. His expertise spans both mining operations and project development across diverse commodities. Driven by a passion for the mining industry, particularly in project development, James created MineBuild Global with a vision to assemble a team of professionals dedicated to delivering operational efficiency and strategic alignment to explorers, developers, and producers.

MINEBUILD GLOBAL

OUR SERVICES

PROJECT MANAGEMENT

Studies	Infrastructure Projects	Mining Project Development
Management of whole-of-project scoping, pre-feasibility and feasibility studies.	Project management of surface and underground infrastructure installations, upgrades and refurbishments.	Project management and delivery through a multidisciplinary, integrated owners team with expertise in mining engineering, project engineering, regulatory approvals, and contract management.

MINING ENGINEERING

Strategy	Mining Planning	Cost Estimation & Financial Analysis
An agnostic, unbiased approach to mining strategy, utilising both open pit and underground stope optimisation processes to provide an indication of value and guide future drilling programs.	Design and scheduling for both open-pit and underground operations, from initial scoping study concepts to detailed, development-ready plans.	High-level to detailed budget cost estimates and financial analysis dependant on study stage and client requirements.

PROJECT ENGINEERING

Scoping and Definition	Planning and Scheduling	Cost Estimation
Scoping and definition of mine site infrastructure requirements from conceptual whole-of-site layouts to specific non-process infrastructure installations on surface or underground.	Development of detailed plans and schedules for timely and efficient project delivery.	Comprehensive budget cost estimates and financial analyses tailored to the specific study stage and client requirements.

COMMERCIAL ADVISORY

Contracting Strategy	Contract Preparation	Contract Tendering and Evaluation
Providing strategic support and guidance to clients on mining, construction, services and supply contracts to streamline agreements and minimise the risk of cost escalation and schedule delays.	Preparation of ready-to-tender mining, construction, services and supply contracts with focus on thoroughly detailing the operative sections, drawing upon our practical, hands-on experience.	Preparing and issuing contract tender documents, managing the tender process, and evaluating submissions for award recommendations.
